

Mobile Detect introduces RadWatch and RadCheck Product Lines

OTTAWA, Nov. 27, 2007

Mobile Detect introduces the RadWatch and RadCheck product lines at the 2006 Showcase for Innovative Security Technology in Ottawa, Canada.

This event provided a unique opportunity for Mobile Detect to introduce the product lines to senior government officials in defence and security, senior executives from major defence companies and systems integrators and venture capitalists.

The “RadWatch” products feature networks of static and/or mobile Detection Units with ATS Radiological Sensors to provide a Gamma Radiation Surveillance Network over a protected facility, area or community. These products are:

[Airport RadWatch](#)

[Bomb RadWatch](#)

[Community RadWatch](#)

[Portable RadWatch](#)

[Traffic RadWatch](#)

[TransitGate RadWatch](#)

The “RadCheck” products feature a single static or mobile Detection Unit with an ATS Radiological Sensors deployed to investigate an incident, suspicious item or area, or to protect people, an item or an area. These products are:

[Bomb RadCheck](#)

[Portable RadCheck](#)

[Vehicle RadCheck](#)

Information, images and cut sheets for these products are available at <http://www.mobiledetect.com/pages/ProductPages/AirportRadWatch.html>.

Mobile Detect Inc. provides unique Canadian technology delivering cost-effective counter-terrorism solutions to protect airports, critical infrastructure, and communities from radiation.

The event was hosted by CADSI (Canadian Association of Defence and Security Industries), OCRI (Ottawa Center for Research and Innovation), the Ottawa Security Cluster and The Conference Board of Canada at the November 27, 2006 at the Crowne Plaza Hotel in Ottawa.
